VIDYA is a 35-year-old registered Not-For- Profit NGO working to Educate, Empower and Transform the lives of the women and young girls from the marginalized communities through its academic skill development programs. Training is being provided in areas of tailoring, hand embroidery and product design. Currently in Bangalore, we provide training out of two locations, one at Marathahalli and the other at Hulimavu in South Bangalore.

VIDYA’s Margam initiative provides a mechanism for trained women to design, develop, produce and sell products that can be made in their own homes to provide supplemental income and financial independence.
