

Life Skills form the base of every responsible citizen. At VIDYA life-skill is one of the core pillars leading towards holistic development of the child. In this year topics like empathy competition and gratitude were covered. To practice these skills students did a post activity which helped them to experience theoretical learning. Sessions of life skills were conducted by the centers to make students socially responsible and productive citizens. Hands on activities were conducted so that the students can retain what they learnt in the sessions. To study the impact of life skills sessions, we conducted a behavior analysis on the students. The result of which is mentioned below:

The behavioural change analysis conducted in the program has helped to map the behavioural change that has happened in the students over the span of a year. In the long run, the changes in the behaviour of students will encourage community transformation in the communities. We are tracking the change in the students in the parameters which will help them bring sustainable change in the community.

The Beyond School Program at VIDYA Mumbai is aiming to create leaders in the community that will accelerate and amplify the work VIDYA is doing. They will contribute to the vision and mission of VIDYA. As a collective the change will be far reaching and sustainable.
